

## About Us

Arthur Anderson Financial Services Company has been primarily designed and structured to provide the essential components that a small business needs to maintain stability, and to achieve a high level of profitability, growth and success. We are an e-commerce, information technology based company that utilizes **state-of-the-art financial software and IT applications.**

Our Firm has assembled a team of business professionals that specialize in multiple areas of business operations. We understand that there are numerous components in managing a business, and usually, in order to achieve success, each one of them should be carefully organized and managed.

Our Company functions through e-commerce applications; such as: email, live chat, video zoom meetings, telephone communications and various social media apps. Direct personal face to face meetings or direct physical contact are not usually necessary.

We are based in Tampa Bay, Florida and service our local community as well as both the national and international business markets. We realize that most geographical business sectors are unique, and we specialize in evaluating the business characteristics of each sector. This enables us to better service our clients.

With regards to our clients, we know that a client's financial information and trade secrets can have enormous value and be subject to precarious sensitivities and should be protected.

Therefore, we maintain a strict level of confidentiality and privacy and do not share our client's information or data with anyone unless specifically requested to do so by the business owner or managing principle of the business.

Our primary objective is to assist a business owner in efficiently managing their business, but never to manage it for them. Their success becomes our success.

If you feel our Firm can be of benefit to you, we invite you to contact us at your convenience.

Respectfully,  
Arthur Anderson
